

Ryan Ong

T: 3476043855

E: ryanong@gmail.com

Summary

Jack of all trades, master of most.

Experience

Software Engineer, Pivotal Labs

New York, NY — November, 2011 - January, 2013

As a consultant for Pivotal Labs we helped clients take their product from idea to finish, creating a base for our clients to start a stable company with. We would teach them Lean business practices, Agile product development, and Test Driven Development. I was a full stack web developer which helped design and create their server infrastructure, backend domain modeling, and front end user experience.

Projects

- Efficiency 2.0 (now known as C3 energy residential)
 - Sped up the process of adding new clients from a period of two months to one week using rails engines.
 - Created an application that estimated how much money a business would save on a given building using in house building modeling tools.
 - Simplified deployment by using capistrano to execute chef-solo on different environments
- Unpakt.com
 - Rebuilt backbone app to use best practices.
 - Simplified code and removed duplication to increase feature development speed.
- CaseBook2 for the Case Commons Foundation
 - Created a new server and code deployment system that decreased deployment from 4 hours to 15 minutes using chef and capistrano.

Lead Developer, CarZen

New York, NY — September, 2009-November, 2011

Started off as a junior developer and became their lead developer over a period of 2 years.

Accomplishments

- Mentored two junior developers
- Launched two sites within estimated deadline.

Education

Skidmore College

BS in Management and Business — 2005-2009

Skills & Interests

Ruby, Python, Javascript, Go, Erlang, MySQL, postgresql, MongoDB, CouchDB, DevOps, git, Photoshop, Doctor Who, Reddit, Hacker News, Burning Man, Interactive Tech Art
